EXPERIENCE

1999 - 2024

Software Engineer
Mergent/London Stock Exchange Group

Beginning in 1999, I embarked on my journey in software development, diving into the world of object-oriented programming (OOP) at Mergent Inc. During this time, I honed my skills in languages like Object Pascal, Perl, and Ruby, while also connecting applications to databases like Oracle, MySQL, and MS-SQL.

Fast-forward to 2017, when I embraced the modern era of web development. At LSEGH, I delved into cutting-edge technologies, including React and Angular for front-end development. Simultaneously, I explored the powerful capabilities of Node.js and AWS Lambda for back-end tasks.

My focus? Revamping user interfaces. I bridged the gap between legacy systems and contemporary web experiences, ensuring a seamless transition for users. Whether it was optimizing performance, enhancing functionality, or improving user interactions, I thrived on innovation and pushing the boundaries of what's possible in software development.

Technical Scope

React, Angular, Node.js, Amazon Web Services (AWS).

Education

**Bachelor of Science,
Computer Science**

Sharif University of Technology
